

Coilover from Stec Motorsport

are the entry level coilovers and are distinguished by their excellent workmanship and ride quality. The suspension system has already has tens of thousands of fans and is successfully in use worldwide.

The Quality of Stec Coils

The coilovers are galvanized for protection against corrosion. The springs are produced from high quality chrome silicon steel and are then plastic coated. Due to the high quality workmanship and the use of quality materials you have of riding comfort with this suspension.

LOW Installation COSTS:

The installation time takes about 2-3 hours in a workshop. We then recommend an appropriate electronic wheel alignment to be carried out. We always recommend installing at a specialist workshop.

The quality:

One of the oldest and well known providers for coilovers in Germany. coilover systems such as High Sport, Silverline, Koni sport and Silverline X are produced directly at Backnang. Thesesuspensions are already proven in hundreds of thousands of cars and in use worldwide.
